Introduction

- Honesty and integrity
- Attention to detail
- Upholds workplace ethics
- Safe and responsible

My computer skills are my greatest asset - specifically the Linux operating system and GIMP - and am able to quickly learn, understand and adapt to any workplace system and its software.

I am most confident using Linux-based operating systems but am also comfortable using Windows 11.

I am seeking part-time, remote employment to work from my home office with an adaptable roster which can respect my commitment as a full-time single parent.

I am immediately available for early morning and evening hours and am happy to engage remotely to complete required work tasks.

Past employment

2012-2017

Warehouse Operator - Aldi Distribution Center

I was a valued team member and enjoyed a close working relationship with my co-workers.

My responsibilities involved picking orders, wrapping pallets and regular/high-reach forklift duties.

Prior 2011

Photographic Imaging Professional - Kodak Photographics

I had primary responsibility as Store Manager, at multiple labs, ensuring all photographic print operations were maintained to the controlled quality and standards as required by Kodak audits.

I was solely responsible for integrating GIMP into the pre-print process.

I also performed intensive photographic digital restoration and archival.
